Topics of interest include but are not limited to:

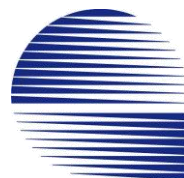

- Energy sources and power markets
- Electric power systems
- Electrical machines and drives
- Power electronics and applications
- Electrical materials
- High voltage techniques
- Electronics
- Biomedical electronics
- Digital Systems
- Circuits and systems
- Signal processing
- Electromagnetics, microwave
- Antennas and propagation
- Optoelectronics
- Communication theory and systems
- Sensors and instrumentation
- Control theory and applications
- Mechatronics
- Robotics and automationsystems
- Intelligent systems

Instructions for Authors

Your contributions, presenting original work, are expected in the form of regular papers, special session papers, by the deadline of **August 18th, 2017**.

Proposals from potential Special Session organisers are also expected by **June 14th, 2017**, addressing more specific topics within the general scope of the conference.

Each accepted paper will be published in the conference proceedings, subject to advance registration of at least one of the authors. Proceedings of the conference will be published on CD-ROM and will be submitted to the IEEE Xplore.
